

WT8000 Composite Tape

GacoSeal™ WT8000 Composite Tape is a pressure-sensitive sealant tape designed for adhering bagging films to platen surfaces. It bonds well with silicone blankets, nylon, and PVC films, ensuring strong adhesion on various tool surfaces. It maintains a reliable seal across cure cycle temperatures from ambient to 285°F (140.5°C).

FEATURES

- Easy to apply by hand (user friendly)
- Ideal for oven or autoclave cure
- Room temperature to 285°F (140.5°C) cure cycles
- Strips clean from various tool surfaces
- Tenacious adhesion to nylon films and tool surfaces
- Non-Hazardous and thermally stable
- 14 months when stored at or below 80°F (27°C)
